

Mechanical Outline

PD13T03 Ultra Low Profile 0805 Power Divider

Rev A1.0

Description

The PD13T03 is a low profile, sub-miniature Wilkinson power divider in an easy to use surface mount package. The PD13T03 is ideal for high volume manufacturing and delivers higher performances than traditional printed and lumped element solutions. The PD13T03 is matched to 50 Ω and has a height profile of 0.5 mm which is ideal for high level integrations in the following markets: DVB-S, DVB-H (USA), GSM, DCS, PCS, CDMA, 3G and GPS. The PD13T03 does not include the resistive element and therefore, requires an external resistor for operation. The PD13T03 is available on tape and reel for high volume manufacturing pick and place.

Features:	Electrical Specifications								
 • 1100-1600 MHz • 16dB Isolation (output ports) 	Frequency	Isolation	Insertion Loss	Return LOSS Min (dB)					
High Return Loss	MHz	dB Min	dB Max	Input/Output					
0.5mm Height Profile	1100-1600	16	0.5	14/18					
 50Ω Input / 50Ω Outputs 									
 Low Insertion Loss 									
 Surface Mountable 	Amplitude	Phase	Power	Operating					
Tape & Reel	Balance	Balance	Avg. CW Watts	Temp.					
 Non-conductive Surface 	dB Max	Degrees	at 105°C	°C					
 RoHS Compliant 	± 0.40	± 3.0	2	-55 to +85					
 External resistor required 									
 Halogen Free 									

Notes:

1. All the above data are based on specified demo board.

2. Insertion loss: Thru board loss has been removed.

Power Divider Pin Configuration

The PD13T03 has an orientation marker to denote Pin1. Once port one has been identified the other ports are known automatically. Please see the chart below for clarification:

Mounting Configuration:

In order for surface mount components to work optimally, the proper impedance transmission lines must be used to connect to the RF ports. If this condition is not satisfied, insertion loss, Isolation and VSWR may not meet published specifications.

An example of the PCB footprint used in the testing of these parts is shown below. In specific designs, the transmission line widths need to be adjusted to the unique dielectric coefficients and thicknesses as well as varying pick and place equipment tolerances. In addition, since the PD15T03 is a Wilkinson power divider, an external $0603\ 100\Omega$ resistor must be mounted in locations R1 as shown in the Figure below.

Pad Footprint w/ 0603 Resistor Locations

NOTE:

- 1. 50Ω line width is shown above designing.
- 2. Bottom side of the PCB is continuous ground plane.
- 3. All dimensions shown in mm [inch].

Notice:

- A.10 Sprocket hole pitch cumulative tolerance is 0.2mm.
- B. Carrier camber shall be not more than 1mm per 100mm through a length of 250mm.
- C. All dimensions meet EIA-418-B requirements.
- D. A0 & B0 measured as indicated.
- E. K0 measured from a place on the inside bottom of the pocket to top surface of carrier.
- F. Material: PE 100
- G. Thickness: 0.20±0.05mm
- H. 4000 units (maximum) / T&R
